

GLOBAL ALLIANCE

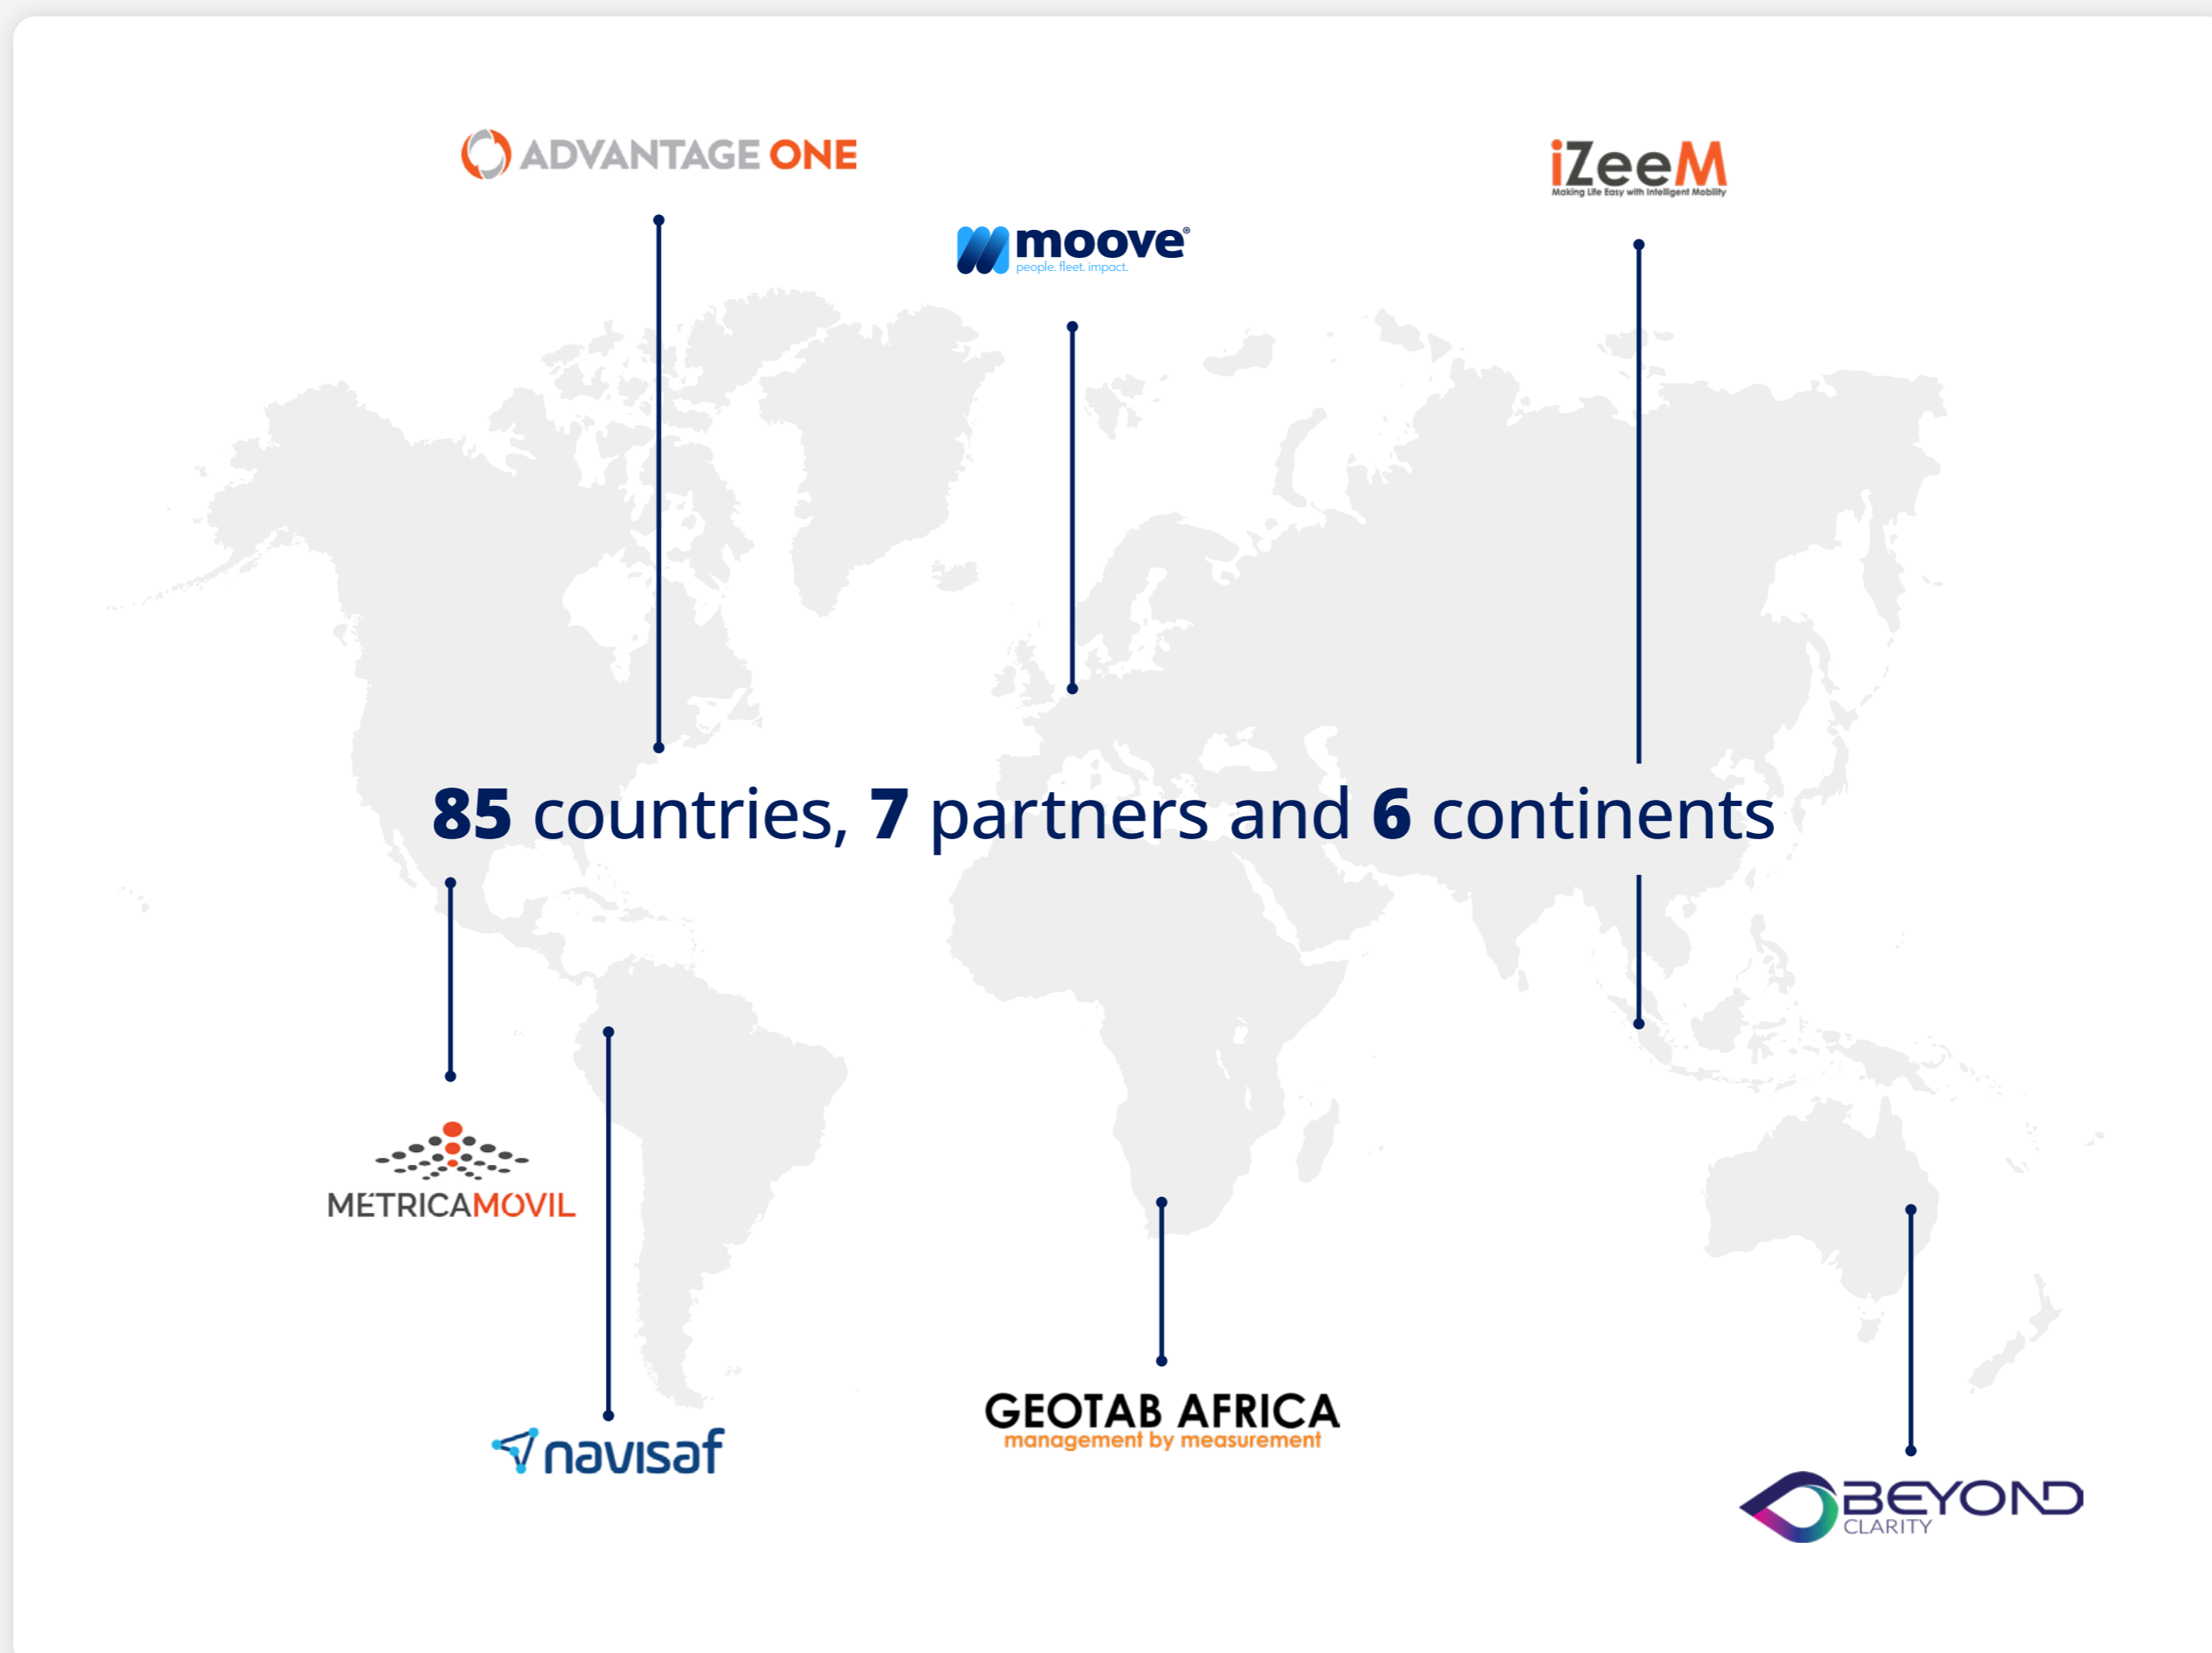

Fleet telematics puts you in control

Fleet telematics is the solution that will give you more control over the performance of a global fleet. By linking your vehicles to the advanced technology of our partner Geotab – the global market leader in telematics – you’ll have real-time insight into all user data. Data that allows you to make the right operational decisions, minimize costs, and that can drive behavioural change that optimises the efficiency and sustainability of your fleet and increases the driving safety of your employees.

The Global Alliance for worldwide fleet management

We’ve partnered with the Global Alliance network in order to manage your fleet worldwide. That means you only have to deal with one company, which offers you the same solutions and level of service wherever you are. Our alliance partners all have their own expertise, so we can also provide tailor-made solutions when the local market demands it. As a customer, our Global Alliance makes it possible for you to benefit from an international knowledge base. You can be sure that you will achieve the most important KPIs with our telematics solutions and that the most important data privacy and IT security issues are taken care of.

Partners

Beyond Clarity is based in Brisbane with corporate and government clients across Australia and New Zealand. Our focus is providing clients with not only a full set of telematic/gps tracking features and benefits from the global leader Geotab but also with key operational data for the transition of fleets to electric.

Geotab Africa is an advanced Telematics company, or advanced tracking company, providing solutions to fleets in various industries. Our focus is on rich, high quality data, and applying the necessary analytics to transform this data into actionable intelligence for fleet managers.

IZEEM is an IoT based system integrator leveraging world's leading and advanced vehicle technologies to support corporations in their digital transformation journey and enabling operational efficiency, business scalability and sustainability.

Advantage One is a Connected Vehicle Solution Consultant specializing in robust and complex deployments of the Geotab Telematics solution with a focus on systems integration and driving value from fleet data.

With some of Mexico's largest companies and thanks to Geotab, Métrica Móvil offers a series of robust telematics solutions for any type of fleet. Providing real-time data, we help companies go through a digital transformation so they can obtain safer, more productive, and measurable operations.

Since 2013, Navisaf has selected Geotab as the sole provider of technology for data extraction from vehicles and thus build operational value layers dimensioned from behavioral engineering. OEM companies such as Navistar, Mack and Daimler distributors in Latam, as well as financial companies such as Renting Colombia, have selected Navisaf for its extensive software and hardware development capacity, allowing them to develop new service models.

About Moove

Moove is your global partner for fleet telematics. We work with our customers on a people-first basis. Technology plays a vital role in our field, but we always put people first when it comes to making a real impact for our customers. We will do anything for our clients and keep going until we achieve the desired result, using the most advanced technologies, which we are constantly developing and improving.
